DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24 drawn to a method for adding a heat-sensitive active material such as an enzyme or antibody to a composition comprising specified steps herein, classified in class 424, subclass 464 for example.
- II. Claims 25-41 drawn to a method for adding a lactose-converting active to a lactose-containing composition and converting at least some of the lactose in the lactose-containing composition to another substance comprising specified steps herein, classified in class 424, subclass 464 for example.
- III. Claims 42-43 drawn to a device for imparting a beneficial effect to a composition comprising specified components herein, classified in class 424, subclass 464 for example.
- IV. Claims 44-46 drawn to a tablet comprising specified components herein, classified in class 424, subclass 464 for example.

Inventions Group I-IV are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions are separate and distinct each from the other because they have different functions. The invention of Group I functions to

Art Unit: 1617

add a heat-sensitive active material such as an enzyme or antibody to a composition. The invention of Group II functions to add a lactose-converting active to a lactose-containing composition and further convert at least some of the lactose in the lactose-containing composition to another substance. The invention of Group III is drawn to a device for imparting a beneficial effect to a composition whereas the invention of Group IV is drawn a tablet herein. Therefore, they have different functions.

The search for all inventions would place an undue burden on the Office in view of the diversity in the field of search for each.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. David E. Rogers on October 2, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1617

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Jiang, whose telephone number is (703) 305-1008. The examiner can normally be reached on Monday-Friday from 9:00 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minna Moezie, J.D., can be reached on (703) 308-4612. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-1235.
